

City of La Quinta

CITY COUNCIL MEETING: July 7, 2015

STAFF REPORT

AGENDA TITLE: AWARD CONTRACT TO AMERICAN ASPHALT SOUTH, INC. FOR FISCAL YEAR 2015/16 SLURRY SEAL PROGRAM

RECOMMENDATION

Award a contract to American Asphalt South, Inc., in the amount of \$678,656 to construct the 2015/16 Slurry Seal Improvements, Project No. 2012-07C.

EXECUTIVE SUMMARY

- As part of the Pavement Management Program (PMP), the City routinely reconditions streets with an oil and sand mixture (i.e., slurry seal) in order to extend the pavement life. The 2015/16 program will recondition the streets in the City's northern communities. A location map is provided as Attachment 1.
- American Asphalt South, Inc. of Fontana, California, submitted the lowest responsive bid in the amount of \$678,656 and is recommended for this construction contract.

FISCAL IMPACT

The PMP is included in the 2015/16 Capital Improvement Plan and is programmed to receive \$1,000,000 from the City's General Fund. There are sufficient funds to complete this project.

BACKGROUND/ANALYSIS

The Pavement Management Update Report, dated August 2012, presents an inventory of City roadways and identifies current condition, roadway preservation needs and a funding schedule. During 2015/16, the PMP recommends slurry and crack seal for streets in northern neighborhoods.

On June 2, 2015, City Council approved bid documents and authorized staff to advertise for construction bids. The City received three sealed bids on July 2, 2015; a detailed bid comparison summary is provided as Attachment 2. American Asphalt South, Inc., submitted the lowest responsive bid in the amount of \$678,656 and is therefore recommended for this project.

If this contract is awarded on July 7, 2015, the construction schedule is as follows:

Council Construction Award	July 7, 2015
Execute Contract and Mobilize	July 8 through July 29, 2015
Construction (40 working days)	August through September 2015
Accept Improvements	September 2015

ALTERNATIVES

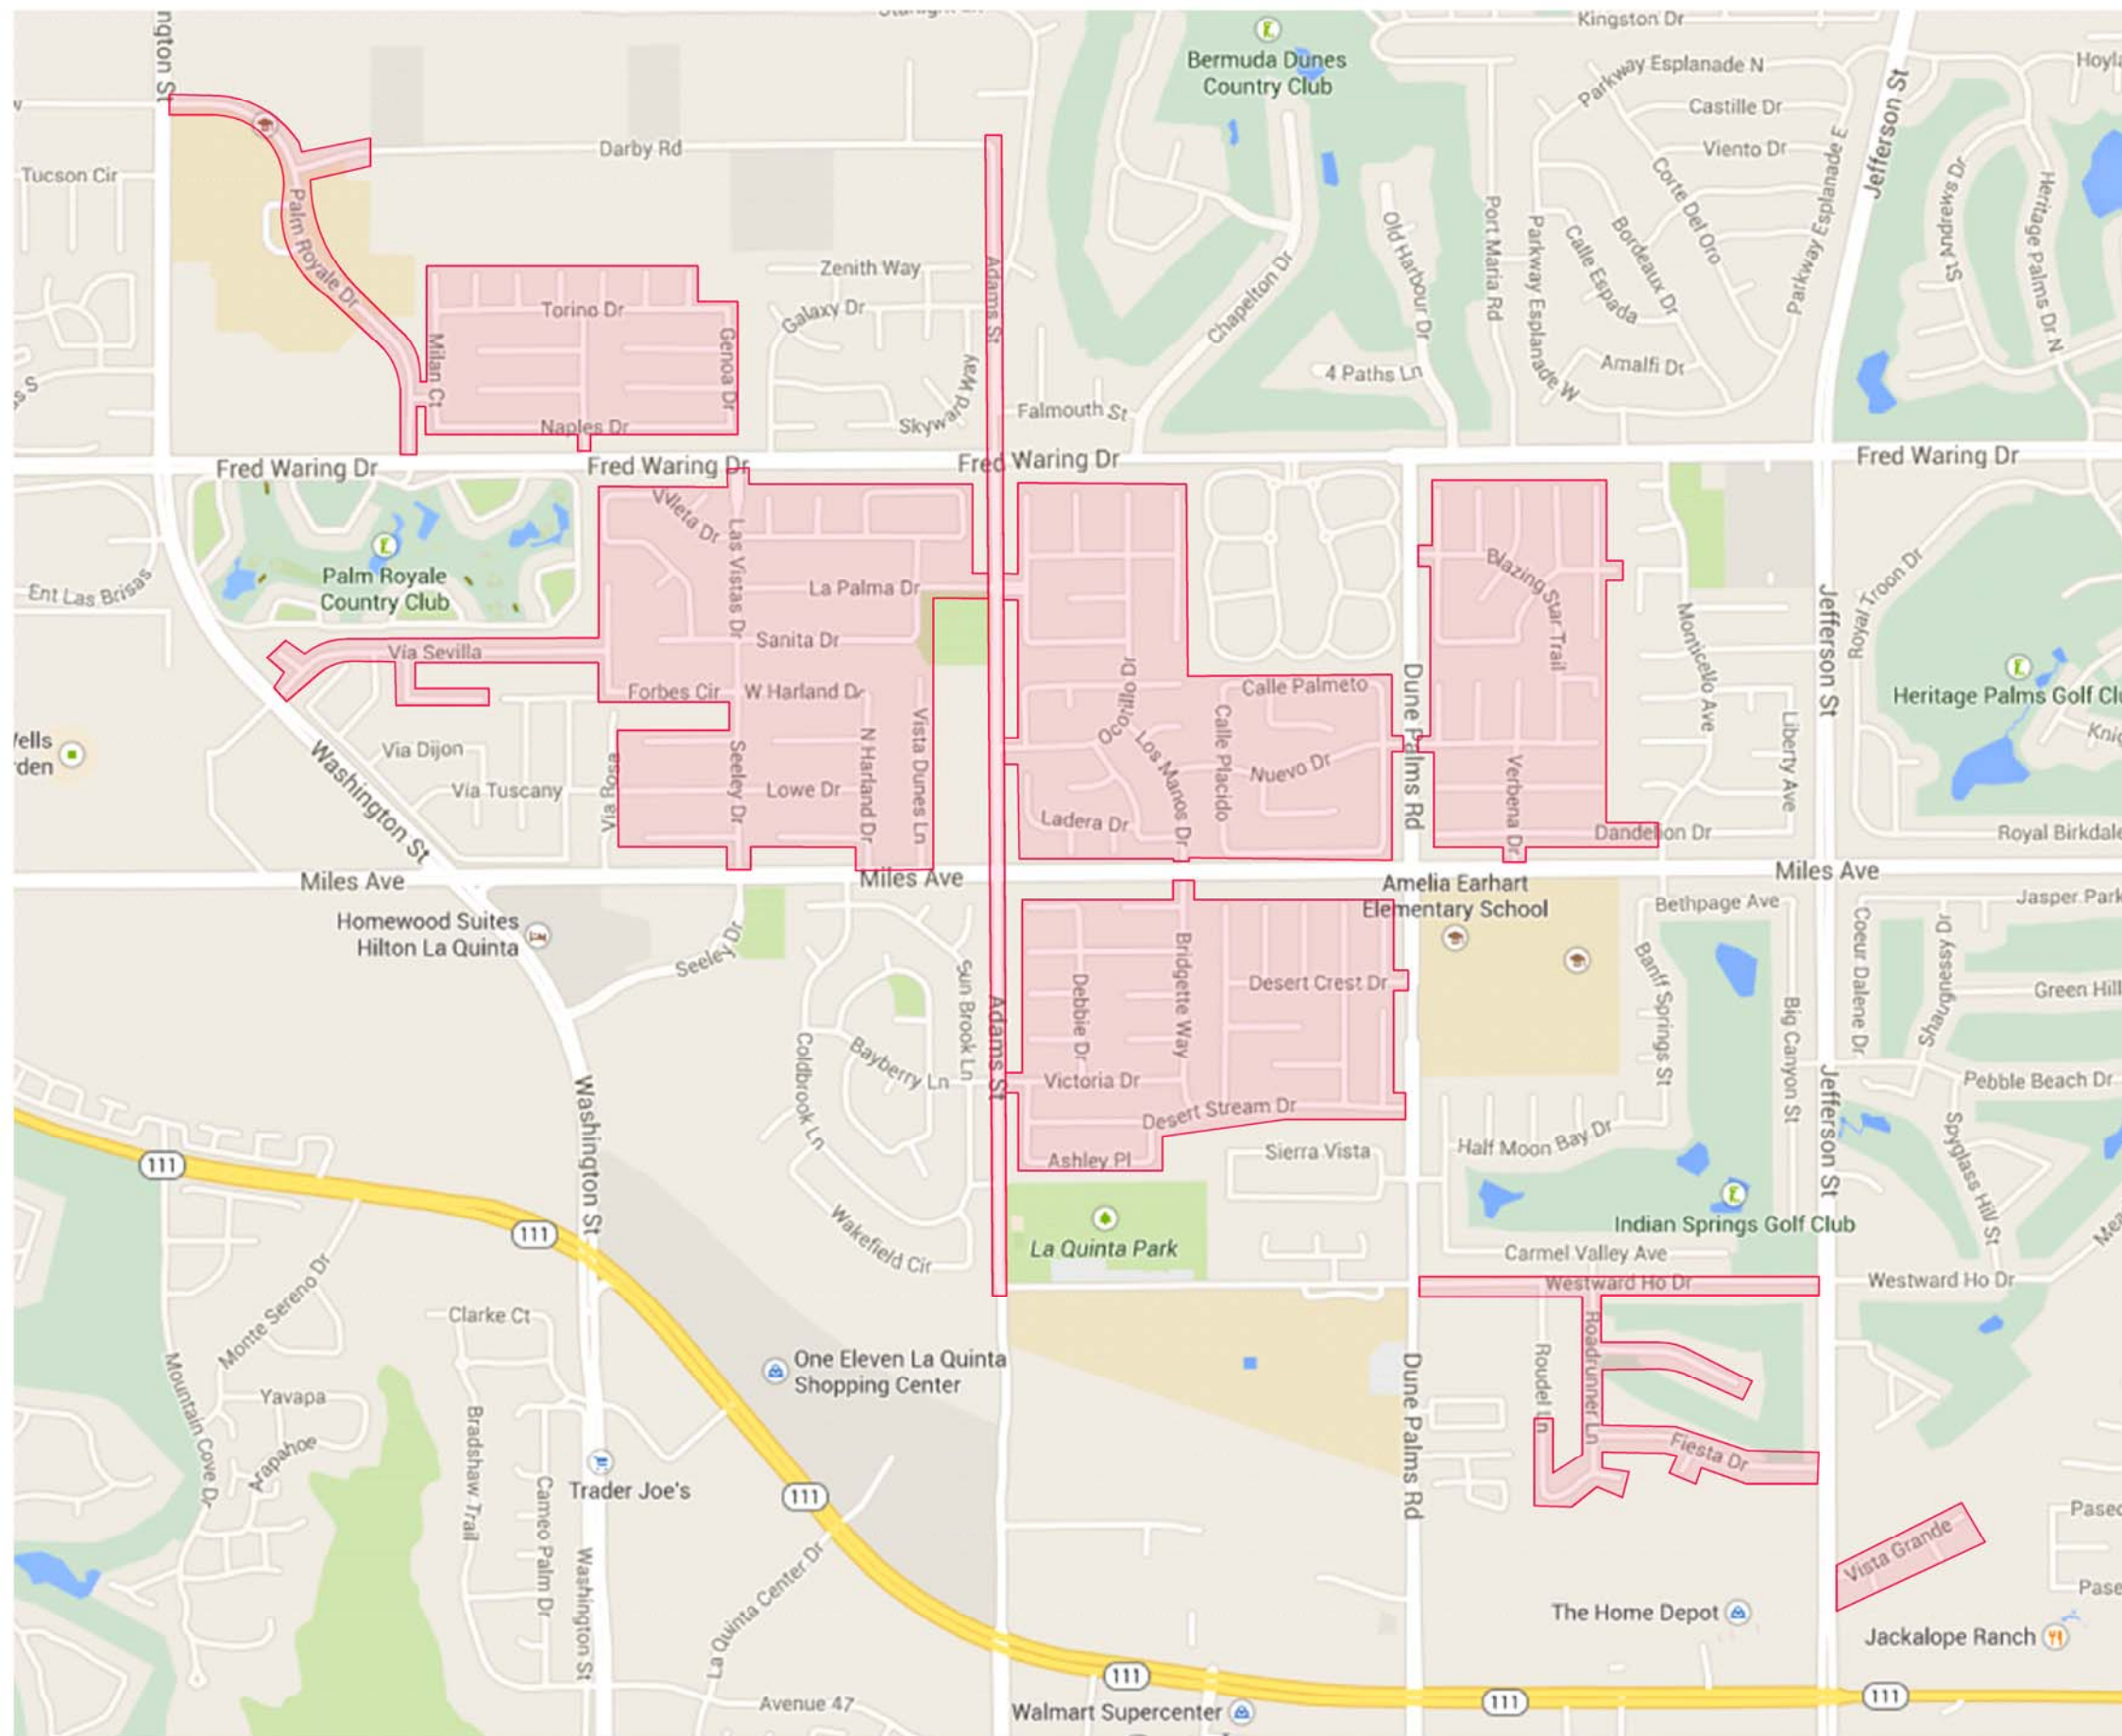

Since the PMP program is necessary to ensure maximum service life of City streets and this project is best constructed during the summer months when there is less disruption, no alternative is recommended.

Report prepared by: Ed Wimmer, P.E., Principal Engineer

Report approved by: Timothy R. Jonasson, P.E.
Public Works Director/City Engineer
