| Projected Diversion: |
| <input style="width: 80%;" type="text"/> |

I understand it is the property owner's responsibility to submit copies of weight tickets or receipts to the District Environmental Coordinator as these hauls occur. I hereby certify that completion, implementation and adherence of the Debris Management Plan (DMP) for the above named project shall guarantee that at least 65% of the jobsite waste is diverted from landfilling. The remaining material will be recycled or reused. I will divert, for recycling or re-use, remaining materials generated from the first day of the project through the completion of the project in accordance with this plan. This DMP is issued in the name of the property owner(s) and shall remain their property throughout the construction and/or demolition project. A contractor serving as agent of the owner may obtain a DMP for the owner. However, the DMP is still issued in the name of the property owner(s) and the owner retains legal responsibility for ensuring that the provisions of the DMP are adhered to. The property owner(s) and general contractor shall be kept informed of the diversion progress through bi-monthly reports. If self-hauling, all refuse material from this project site must be taken to an approved recycler or transfer

Owner / Developer / Project Manager / Superintendant _____

Construction Debris Management Plan

Summary of Requirements

As of January 1, 2017, The Green Building Standards Code (CALGreen) requires that the construction of most new structures in the State of California comply with sections 4.408 and 5.408 of the code in accordance with Assembly Bill 939 requiring that no more than 35% of jobsite waste be disposed of as trash at local land fill sites and transfer stations. Exceptions may be made for certain projects under certain conditions.

The City of La Quinta is committed to the highest level of environmental respect, to conserving our precious natural resources and setting an example to provide for a better world for generations to come. Recycling helps keep reusable resources out of landfills and will also reduce disposal costs.

IMPORTANT: Burrtec Waste & Recycling Services is the City's franchise hauler. If you choose to self-haul any recyclables or trash, you must provide copies of all weight tickets and/or receipts from the transfer station, landfill, or recycler as the job progresses. Clean-up companies and other haulers are not permitted to haul waste or recyclables from the City of La Quinta. Self-haul weight tickets should be submitted to: Mike Veto, District Environmental Coordinator - mveto@burrtecdesert.com, or faxed to (760) 340-0417, or mailed to: 41575 Eclectic Street, Palm Desert, CA. 92260.
